DETAILED ACTION
REASONS FOR ALLOWANCE
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Virgil Beaston on December 11, 2003.

The application has been amended as follows:

A) Cancel claims 1-52 and 69-76.

2. The following is an examiner's statement of reasons for allowance: the prior art discloses a method and system for controlling a generator connected to an electric power system having circuits for measuring frequencies. However, the prior art fails to disclose that a first angle and frequency is measured using a first phase locked loop having a first bandwidth and a second phase angle and frequency is measured using a second phase locked loop having a second bandwidth greater than the first bandwidth and calculating a frequency difference

between the first and second estimated frequencies, calculating an angle variation that is proportional to the calculated frequency difference, adding the estimated second phase angle and the calculated angle variation so as to form an output current phase angle reference and controlling an output current phase angle of the generator system to be aligned with the output current phase angle reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
